

Figure 1

The Theia goal model addresses both the functional navigation goals and non-functional security goals and accessibility goals

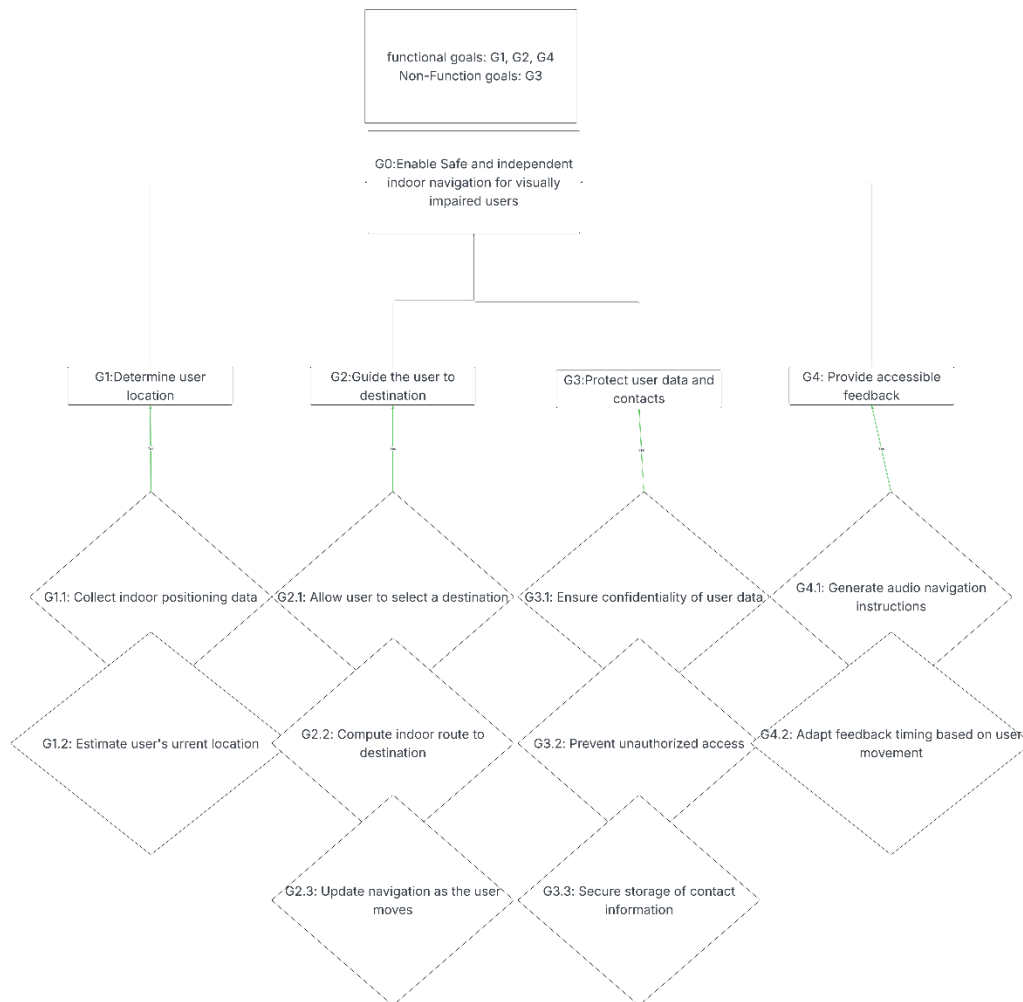

Figure 2

Obstacle model identifying conditions that may prevent Theia from achieving its functional and non-functional goals

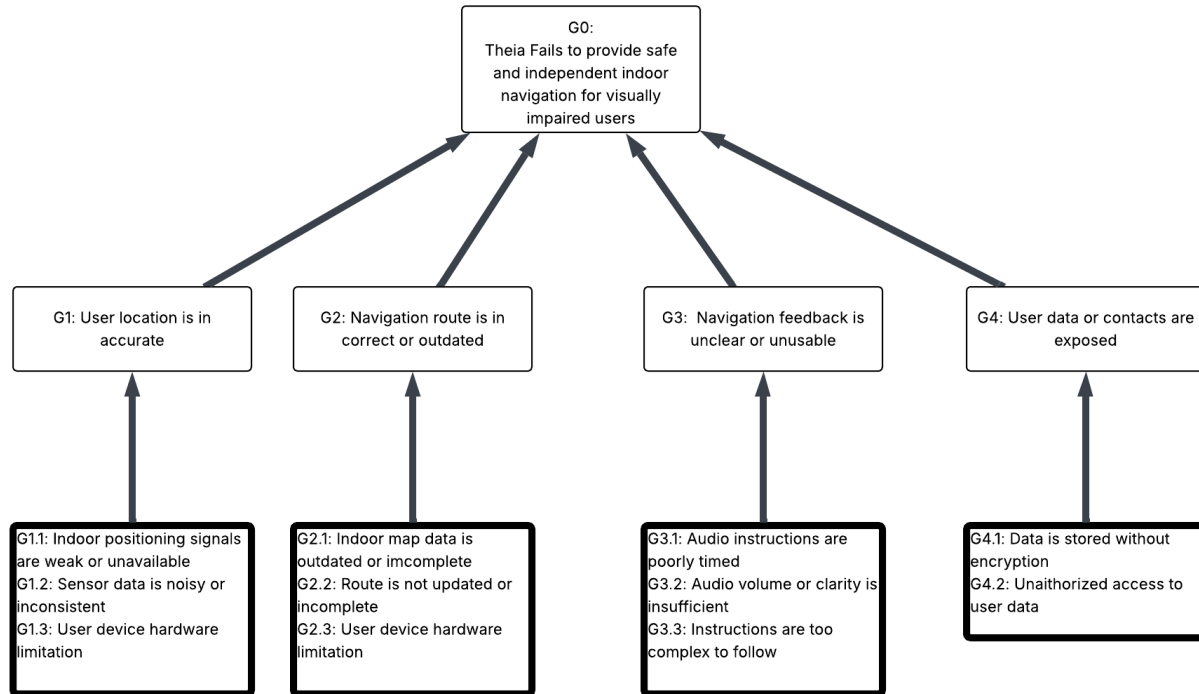

Figure 3

This IDEF0 Model follows the process of distributing work into four main sections

Divide Requirements into sections

- Receive Requirements through Canvas
- Team Members Split them and add them to Kanban Board

Assigning Work

- Team Members take even amounts of work to complete by assigning to themselves on the Kanban board
- Team Members work on their assigned work

Reviewing

- Team members meet and review each other's work
- If task is done then marked as done on Kanban Board

Submitting

- One member submits the work (Link to Repo)

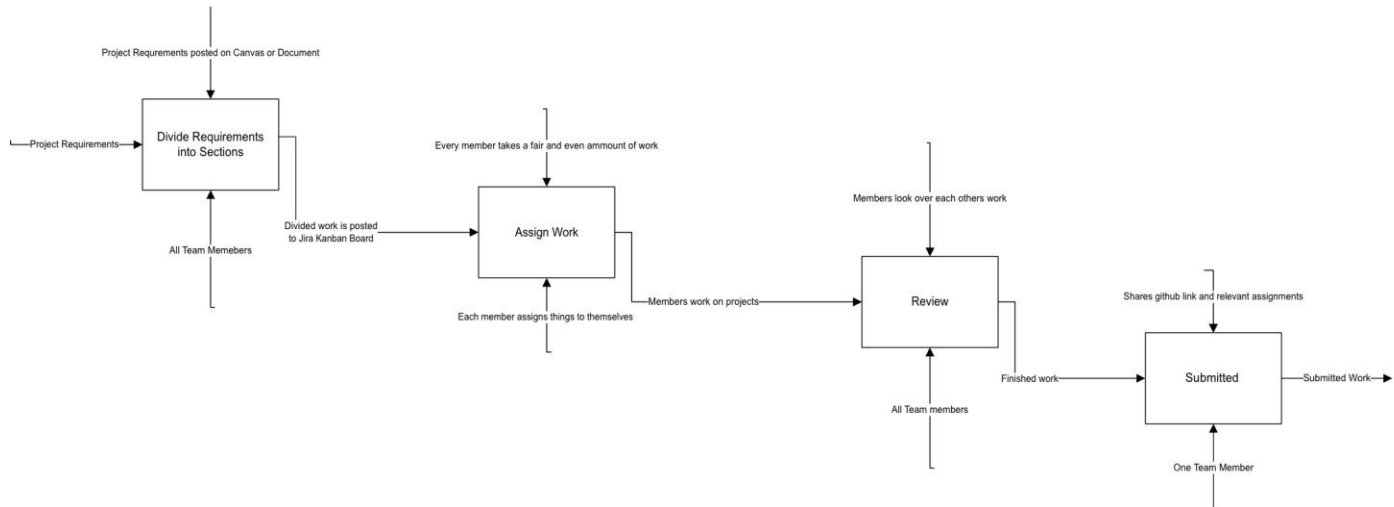

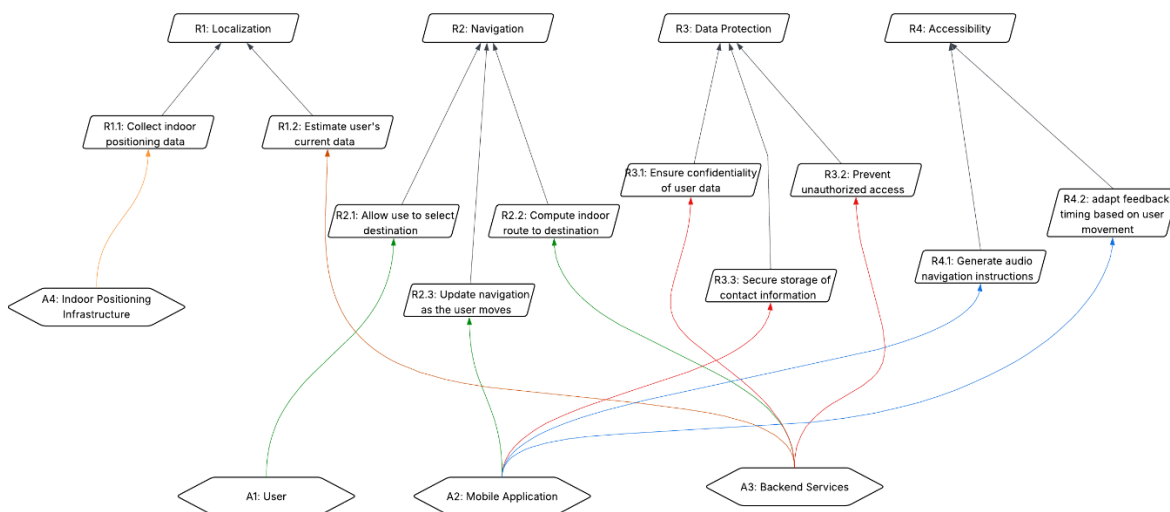

Figure 4

This diagram shows which agent is responsible for each requirement in the Theia system

Color lines show responsibility assignments. Different colors are used only to make the diagram easier to read.
