

Date & Time	Activities	Outputs	Agenda for Next meeting
September 10	Assigned roles for project plan	Started working on the project plan	-Split up the workload
September 13	Assigning roles for Deliverables	Polished up the project plan for submission	-Went over each others -Checked project requirements -filled in our names, discord, and roles
September 24	-talk about our feedback Brainstorm ideas for project -set next meeting -If people can create an account with Atlassian using their WSU email that would be great (for kanban board)	-Brainstorm the project direction -Set the next meeting up -check	-Project ideas Allowing users, and the person that's helping them to create a floor plan on the app, and use the phone as a gps/navigation system
September 29	-Talked about the project plan edits	-Continue brainstorming for project direction	-Create a Figma account using your WSU email ASAP please -Useful figma video: Figma UI Vid -Create a lucid chart account for brainstorming ideas: Theia Board -Decide who wants to lead the WRS doc -See how we can divide work on assignments that already have a lead
October 1	Trying to split the work Adding tasks to jira (make sure to have an account for jira asap)	Tasks added to jira	Choose your tasks from jira Refine out theia plan, make sure everyone's on board

			Make it to the next meeting!
October 6	Tasks have been split between team members. With each having 2-3.	Each member has assigned tasks to complete before Thursday(Oct 9).	Oct 8 – check in on in-progress of assigned tasks and check final result of completed ones.
October 10	Presented current work	*Notes under Presentation Notes header	Next meeting try and decide our development environment (Xcode, android studio)
November 6	- Assessed how best to divide work and what tools will be used for development	- Coding languages are python and swift for project(except database stuff) - Divided up the work between 3 scenarios, user class and data base creation - Set next meeting 5:30 on Nov 14, 2025	- Progress check for each item on the Jira Board. -
November 14	- Asses how each item of the Jira board is coming along	- Continue working on assigned roles	- Check up on work
November 24	- Progress check + Finding best Demo time	- Continue working on assigned items	- Have a set Demo meeting time by looking at poll results
December 4	- Organize Demo details	- Demo code	- Finish and Review assigned work

December 7	<ul style="list-style-type: none"> - Submission Plan: Submit GitHub link to canvas - HAVE ALL WORK POSTED TO GITHUB ASAP 	<ul style="list-style-type: none"> - Reviewed Work 	<ul style="list-style-type: none"> - N/A
------------	--	---	---

Presentation notes:

Focus on user navigation from location a-b and remove obstacle detection.

Emergency mode access phone sensor when fall and ask user if they are okay before calling for emergency, if no response then the phone calls emergency contact/caretaker

Caretaker can set up name, address, or another basic user setup information
